

Gabriel Collaboration Suite™

Private • Secure • Seamless

Gabriel Collaboration Suite provides an integrated set of secure applications including Mail, Messaging, File Sharing & Sync, and Voice Calls. Each feature provides privacy, security and seamless cross-platform communications between trusted contacts. Protect peer-to-peer communications and data with military grade encryption. Communications on Gabriel are invisible to third parties, including VirnetX.

Win/Mac/Linux

Win/iOS/Android

iOS/Android

Private & Secure Voice Calls

Keep conversations private. Free* calling between desktop and mobile devices. Provides secure VOIP capabilities from any Gabriel client.

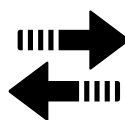

Private & Secure Mail

Send and receive encrypted mail from your device to a recipient without requiring a 3rd-party mail server.

Private & Secure Messaging

Send and receive text and files. All messages are secure to Gabriel users. Automatic & direct connection with military grade end-to-end encryption.

Private & Secure Share & Sync

Share content securely between trusted users and devices. Grant read/write access to desired folders. Securely sync files between devices.
